

MD ABUL HAYAT

Mailing Address:
Email: mahayat@uark.edu

3217 Bell Engineering Center, University of Arkansas, Fayetteville, AR 72701, USA
Website: <https://mahayat.github.io/> **Mobile:** +1-479-800-8644

EDUCATION

University of Arkansas, Fayetteville, AR

Expected: August 2022

PhD student of Electrical Engineering

Courses: Deep Learning, Machine Learning, Information Theory, Statistical Inference, Computational Statistics, Time Series.

Bangladesh University of Engineering & Technology (BUET), Dhaka, Bangladesh

September 2015

Bachelor of Science in Electrical & Electronic Engineering

Courses: Digital Signal Processing I & II, Microwave Engineering, Digital Communication, Power System Analysis.

TECHNICAL SKILLS

Programming Languages:

Python, R, MATLAB, C++, C, AMPL

Machine Learning Frameworks:

Keras, TensorFlow, PyTorch, NumPy, SciPy, Pandas, scikit-learn, Jupyter

Engineering Applications:

Simulink, PowerWorld, PSpice, Tableau, L^AT_EX

Other Skills:

Git, Bash, Linux, High Performance Computing

WORK EXPERIENCE

University of Arkansas, Fayetteville, AR

August 2017 – Present

Graduate Assistant, Electrical Engineering

- Analysis of Peripheral venous pressure (PVP) signals under different clinical conditions using statistical and deep learning.
- Developed a Kalman filter and hidden Markov model based unsupervised anomaly detection algorithm for PVP signals.
- Applied deep learning techniques like CNN, Grad-CAM on PVP signals to identify discriminatory behaviors.
- Developed a Gaussian mixture model (GMM) based Bayesian unsupervised algorithm for rice panicle detection.
- Developing U-Net based supervised image segmentation model for rice panicle detection.
- Applied classical dimension reduction techniques like PCA, Kernel-PCA; regression techniques like GLM, LASSO, Ridge and classification algorithms like k-means, KNN, DBSCAN, OPTICS, SVM in MATLAB and Python.

Nokia Bell Labs, Murray Hill, NJ

June 2019 – August 2019

Summer Intern – Math & Algorithms, Human Augmented Sensing Group

- Applied deep learning techniques on Optical Coherence Tomography (OCT) images of skin.
- Mentors: Atefeh Mohajeri, William Sean Kennedy

Grameenphone, Dhaka, Bangladesh

October 2015 – August 2017

System Engineer, Regional Operations Department

- Grameenphone, part of the Norwegian Telenor Group, is the largest telecommunications operator in Bangladesh.
- Worked with more than 400 BTS/nodeBs of Huawei. Planned and implemented diversity techniques. Analyzed possible issues of MPD degradation and TCH congestion.
- Implemented different radio aggregation techniques on wireless backhaul devices like NEC iPasolink, Huawei Optix RTN900 and SIAE ALCplus2. Analyzed and solved performance issues like IPPM loss and Ping Packet loss.

ACCOMPLISHMENTS

- Member of the runner-up team in 'Xtensa Design Contest 2015' organized by Cadence India on 'Adaptive Beamforming with Microphone Array'.
- Best paper award in '3rd Student Paper Contest 2014' hosted by IEEE Communications Society Bangladesh Chapter.
- 11th in Dhaka round, '5th National Undergraduate Mathematics Olympiad 2013' of Bangladesh Mathematical Society.
